Environmentally friendly fuel, down to -196 °C

VC-LNG Vent Coupling

SB-LNG Breakaway Couplings with LNG Hose Assemblies

N-LNG Refuelling Nozzle

## Reliable LNG Refuelling Products

Liquefied natural gas (LNG) is considered as an alternative to Diesel refuelling in the heavy-duty transport. The expansion of the LNG station network has accelerated in the recent years.

ELAFLEX is best known for its refuelling nozzle and hose assembly range, globally used on petrol station forecourts. We have used our extensive knowledge to offer well-developed components for a safe and easy-to-use bus and truck refuelling of LNG.

# Advantages of our LNG Components

- High quality refuelling products
- Superior service life
- Quick and easy exchange of N-LNG front seal without depressing the system
- Enable easy handling and prevent direct contact to cold components
- Delivery as complete, tested refuelling system
- Short lead times
- Total lifetime cost benefits

## Accessories

- Rain cover option to protect the refuelling nozzle against outer influences
- Bonding reels of polyester powder coated steel or stainless steel, spring-rewind (any colour) or manual-rewind (ATEX approved)
- Cover hose CH-LNG

Optional:  
'RC' Rain Cover for N-LNG nozzle

Optional:  
Bonding reels

Spring-rewind

Manual-rewind
